

Lotus Elan

M100

Canopy Stowage
Care points for folding hood

1) Canopy pictured in open position

2) Canopy folded showing highlighted are of pressure caused by frame.

3) Picture showing area on canopy when partially folded that needs moving to prevent fouling on canopy

4) Slide canopy over linkage to relieve pressure on material.

5) Canopy should be clear of frame as shown

6) Make sure canopy is well clear of frame before moving to other side

7) Repeat operation on other side of frame.

8) Stand at rear of vehicle and make sure canopy is pulled clear of linkage before folding into stowage position.
